# Roman Glass Amphora

An ancient Roman iridescent glass amphora with cylindrical neck and blue handles.

Ca. 2nd - 3rd century AD.
Height: 4 in. (10 cm).

Ancient glass manufacture had begun in the 2nd millennium BC in Mesopotamia and Egypt. The Greeks and Phoenicians advanced glass technology greatly in the latter 1st millennium BC. In the early 1st century AD, Roman workshops began producing blown glass on a large scale. Eventually glass vessels came to replace a wide variety of pottery and metal wares in the ancient world. Ancient Roman glass was traded far beyond the Roman empire. Roman glass vessels have been found in Scandinavia, India, and in Han Dynasty tombs in China.

Formerly in the collection of Jerome Eisenberg, New York, acquired at Sotheby's, New York in 1988.
